PROFESSIONAL SUMMARY

Electrical and Electronics Engineering student with hands-on experience across EV infrastructure, battery innovation, product development, and digital systems. I combine technical analysis with execution, leadership, and stakeholder engagement, and I am particularly interested in sustainable mobility, embedded systems, and practical engineering solutions that create measurable social and commercial value.

EXPERIENCE

Electronics Engineering Attaché | *UTU Cars Africa*

Apr 2025 - Jun 2025

- Supported EV operations by maintaining charging-session logs, generator usage reports and invoices, fleet inspections, and departmental tracking sheets for networks, suppliers, and warm contacts.
- Contributed to technical work on the in-house UTUjaze charger through BMS diagnostics, EVSE standards interpretation, single-line diagram support, 3D box design, and box assembly/configuration.
- Assessed EV market trends and prospective charging sites while interpreting energy-platform data to inform infrastructure planning, compliance, and operational decision-making.

Co-Founder & Chief Product Officer | *Afterlife Innovations LTD*

Jul 2024 – Present

- Lead product thinking and innovation strategy for circular battery solutions focused on repurposing, recycling, and sustainable energy access.
- Coordinate concept development, stakeholder-facing communication, and solution-positioning for climate-tech applications in mobility and underserved communities.

Project Engineering Fellow | *UNESCO Chair Strathmore*

Aug 2025 - Present

- Support climate resilience and sustainability initiatives through project engineering, research synthesis, and solution development.
- Contribute to Kukua Collective, a smart cooperative model focused on access to micro-loans, digital market linkages, and farmer-facing innovation.
- Prepare technical and market-facing materials for concept validation, stakeholder engagement, and pilot planning.

Makerspace Lab Fellow | *Strathmore University*

Dec 2024 - Present

- Support student innovation and hands-on prototyping within the engineering makerspace environment.
- Assist peer teams in ideation, technical execution, and practical engineering problem solving across project builds.

i-TEAMS '23 Market Research Lead | *Strathmore Energy Research Centre*

Feb 2023 - Apr 2023

- Led market research activities, analyzed market trends, and produced insights to inform innovation and business strategy.
- Coordinated research tasks and synthesized findings into actionable recommendations for project development.

LEADERSHIP INVOLVEMENT

Chair & CTO | *IET Strathmore Chapter*

May 2023 - Dec 2024

- Led technical initiatives, chapter operations, and student engagement activities within a professional engineering community.

Class Representative | *Strathmore University*

Jul 2021 - Nov 2024

- Represented student interests over three years, strengthening communication between students and faculty while championing accountability and service.

14th Academic Docket Senator | *Strathmore University Student Council*

Sep 2022 - Aug 2023

- Served in student governance, making recommendations on academic and professional matters affecting the student community.

EDUCATION

Bachelor of Science in Electrical and Electronics Engineering | *Strathmore University*

Jul 2021 - Mar 2026

Certificate in Commercialization | *University of Cambridge*

Jan 2023 - Apr 2023

Kenya Certificate of Secondary Education | *Strathmore School*

Jan 2017 - Mar 2021

KEY PROJECTS

Feasibility of Deployment of Sodium-Ion Battery Packs for Urban Transport in Nairobi: A Fleet Simulation and Techno-Economic Analysis | *Featured Project*

Jul 2025 - Present

- Final year project evaluating sodium-ion battery deployment through fleet simulation and techno-economic analysis.

Afterlife Innovations | *Featured Project*

Jul 2024 - Present

- Student-led clean-tech venture focused on battery repurposing, recycling, and circular energy solutions.

Urban LPG Infrastructure Project | *Featured Project*

Jan 2026 - Present

- IoT-enabled LPG safety concept integrating sensing, automatic shut-off, and community alerting for safer dense urban settlements.

Kukua Collective | *Featured Project*

Jun 2025 - Present

- UNESCO Chair project focused on smart cooperatives, micro-loans, and digital market linkages for farmers.

Smart Stima Control Unit | *Featured Project*

Aug 2022 – Jul 2024

- Energy management concept for smarter lighting control and centralized monitoring.

TECHNICAL SKILLS

Power and EV Systems: EV charging infrastructure support, battery systems, BMS diagnostics, EVSE standards interpretation, single-line diagrams, PCB Design & Fabrication.

Embedded and IoT: Arduino programming, IoT systems integration, sensing and monitoring, basic automation, data logging.

Design and Tools: 3D CAD design, circuit analysis, technical documentation, web development, market research.

Professional Skills: Project coordination, stakeholder engagement, communication, teamwork, problem-solving, leadership.

LICENSES

CISCO Networking Academy: IT Essentials | CISCO | Issued Jan 2022

PCB Design | EasyEDA | Issued Oct 2025

Arduino Development | TME Education | Issued Jun 2022

CERTIFICATIONS & AWARDS

- 10th Global Finish in the UNESCO for Sustainable Development World Engineering Day 2026 Hackathon.
- Recognition of Outstanding Leadership & Dedication as a Class Representative (2024).
- 1st Runners Up at the UNESCO & ONEPLANET (Open source nExus Modeling Tools for Planning Sustainable Energy Transition in Africa) Joint WEF (Water-Energy-Food) Hackathon in Conjunction with Living Labs.
- 1st Runners up at the Strathmore University's Inaugural Edition of the Ideas Festival 2022.
- QS Reimagine Education Awards and Conference 2025.
- 1st Runners Up at the Higher Education Partnerships in Sub-Saharan Africa (HEP-SSA) Innovation Challenge 2023 driven by the Royal Academy of Engineering.

LANGUAGES

English - Professional proficiency | Swahili - Native/Professional proficiency | Spanish - Elementary
